Co-Curricular Program Procedures

The co-curricular program consists of:

- A. Activities that are curriculum-related and have been approved as part of the associated student body program; and
- B. Curriculum-related activities that are not part of the associated student body program and which satisfy the conditions and criteria established in this policy and procedure.

Activities which operate as an approved associated student body program must have met all conditions as specified in the ASB Constitution. The school principal will be responsible for assigning a staff member(s) to supervise all such approved programs.

When an activity does not satisfy the ASB program conditions, or ASB status would not be necessary or beneficial, interested students and a proposed staff member sponsor may seek approval and recognition as a curriculum-related activity from the school principal. Each approved group must operate under the guidelines set forth by the principal, including, but not limited to, objectives, membership, supervision, proposed activities and funding.

Approved curriculum-related groups will have use of school facilities and equipment under terms set forth by the school principal. Groups that are not approved as a part of the co-curricular program may apply for use of the school facilities under conditions set forth in Policy 4260, Use of School Facilities.
