

STUDENTS

Accommodating Students with Diabetes

The District Health Specialist or designee is appointed to:

- A. Consult and coordinate with the parents and health care providers of students with diabetes; and
- B. Train and supervise the appropriate staff in the proper procedure for the care of students with diabetes.

The District will develop and follow an Individual Health Care Plan (IHCP) for each student with diabetes. Each IHCP will include an individual emergency plan element. The health plans will be updated annually, and more frequently as needed.

The District, its employees, agents, or parent-designated adults who, acting in good faith and in substantial compliance with a student's IHCP and the instructions of the student's licensed health care provider, provides assistance or services under RCW 28A.210.330, will not be liable in any criminal action or for civil damages as a result of the services provided under RCW 28A.210.330 to students with diabetes.

The Superintendent or designee will establish procedures that implement this policy and follow emergency rescue procedures outlined in the most recent guidelines published by the Office of the Superintendent of Public Instruction (OSPI) regarding the care of students with diabetes.
