#### Guidelines for Attitudes and Values for the Snohomish School District and Athletic Community

The Snohomish School District and athletic community are committed to an athletic program that fosters the self-worth and self-esteem of all our student athletes. We believe the values and attitudes athletes learn through their participation in athletics can provide lessons that will help them be successful in life. The values and attitudes presented in this procedure list the values and attitudes the district believes are important and how it believes each group should demonstrate the value/attitude. The district believes that actions speak louder than words. The role of the administration and administrators is to specifically support, encourage and model all of the values identified as important. These guidelines shall be used for hiring coaches and for monitoring adherence to the values and attitudes which the district believes its student athletes and coaches should represent.

(Pages 2, 3, & 4 are grids and are included in the policy book but not available on line)
