

STUDENTS

Release of Resident Students

The district shall generally approve applications of parents who wish their child to attend school in another school district.

PROVIDED that all resident students with disabling conditions seeking out-of-district placement are subject to a multidisciplinary team finding that appropriate educational placement for the student is not available in Snohomish schools. If such a finding is made, disabled students may be served out-of-district according to the provisions of Chapter 392-135 WAC "Interdistrict Cooperation Programs."

Transportation to and from out-of-district schools for nondisabled students is solely the responsibility of the parents.
