

CURRICULUM/INSTRUCTION/ASSESSMENT

Traffic Safety Education

The board recognizes the importance of traffic safety education. The superintendent or his/her designee shall implement procedures for program supervision, curriculum development, student enrollment criteria, including but not limited to grade level of student, age of student and enrollment status of student; student progress; and collection and refunding of student fees, including provisions for accruing money for future traffic safety program needs or refunding students when student fees exceed the unreimbursed cost of the program; and notice of the availability of fee waivers or reductions.

Pursuant to state regulations, fees shall be assessed to cover those costs which are not reimbursed by state funding, except that this fee may be waived or reduced for students whose families, by reason of their low income, would have difficulty paying the full fee. The USDA Free and Reduced Child Nutrition Program guidelines shall be used to determine qualification for a waiver or reduction.

The traffic safety education program will continue to remain consistent with the rules of the State of Washington and the Superintendent of Public Instruction.
