STRATEGIC PLANNING

Guiding Principles

- Members of the community trust one another, value each other's opinions, and treat each other with respect.

- Members of the community encourage, recognize and celebrate their own and each other's achievements.

- Academic curriculum encourages creativity, critical thinking, and problem solving, is based on clear learning goals, and is improved through continuous districtwide planning, action, and assessment.

- Students realize their individual potential with the aid of sequential curriculum, varied instructional methods, and integrated learning opportunities.

- Students experience a feeling of safety, well-being, and joy in learning.

- Parents are welcome at school and actively participate as full partners in their children's education.

- Time is flexible; learning is constant.
