

## Interested in coaching a Jr.FLL team?

We are offering one last chance to sign up for Jr.FLL robotics this year. We have some interested kids but no coaches. If you can wrangle a group of students and help keep them on track, you can coach. There are lots of great resources to walk you through what to do at meetings and how to teach kids what they need to know. Please e-mail me directly if you'd be willing to help: [karen.hickenbottom@sno.wednet.edu](mailto:karen.hickenbottom@sno.wednet.edu)

## Still interested in having your student join?

**Who:** Students in grades 1st—3rd

**When:** once a week or once every other week depending on team expo choice

**How Much:** \$10 per student

**Why:** The Jr program focuses on team work, coming up with creative ideas to solve a problem, building cool things with legos, using a single motor as a simple machine to make their creation move and presenting what they've learned to others at a low key Expo.

**We've extended the deadline to October 30th!**

Forms are available in the office or attached to the TF newsletter.
