

Tiffany, 4th grade

Art Wizards®

TOTEM FALLS EVERYONE CAN DRAW!

Every child can learn to draw and paint beautifully. And the rewards are significant. Send your child to Art Wizards, and watch what happens. Of course you'll see our students having a ton of fun. You'll quickly notice the quality of your child's artwork goes up...and not just in art class, but in all subjects where drawing, reasoning and visualizing play even a small part. You'll also notice your child has more confidence and self esteem, and is more willing to find solutions and answers on his or her own. Projects will include fish, birds, animals of all kinds, cartoons, movie characters, people and mythical creatures, all fashioned using chalk and oil pastels, watercolors, pencils and markers.

We are to drawing what phonics is to reading

Art Wizards After-School lessons...

- ✦ are individual and noncompetitive
- ✦ are led by trained and qualified instructors
- ✦ use professional grade materials and original lesson plans
- ✦ are age-appropriate, and the kids love 'em

An early step in teaching kids to draw is eliminating the old myth that art is a talent that you're either born with or born without. Drawing is a teachable skill that every child can and should learn. The well-known benefits of learning to draw are too great to ignore. Drawing skills are life skills. Learning to draw is learning to see...learning to look and think ahead. And you end up with some really beautiful artwork.

Students who are actively involved in the arts are:

- ✦ 4 times more likely to be recognized for academic achievement
 - ✦ 3 times more likely to be elected to class office within their schools
 - ✦ 4 times more likely to participate in a math and science fair
 - ✦ 3 times more likely to win an award for school attendance
- And are nearly TWICE as likely to read for pleasure*

And those who draw what they are learning, no matter the subject will

remember it many times longer than those who don't *A Report on Community-based Youth Organizations, Shirley Brice Heath, Stanford University and Carnegie Foundation For the Advancement of Teaching, Americans for the Arts *Monograph*

Jack, 1st grade

8 Mondays begin January 11th,

3:15 to 4:15 in Portable 3
