Growth Management

The Snohomish School District, pursuant to Snohomish County Growth Management Policy, Resolution No. 79-7, anticipates that impacts from projected residential growth within the district will exceed the capacity of the district to provide necessary educational services. The anticipated adverse impacts of residential development within the district can be mitigated by requiring residential developers to share in the cost of providing or expanding the district's capacity to provide educational services.

The district will adopt and promulgate rules, procedures and fee structure implementing the Snohomish County Growth Management Policy, requiring developers of residential property within the district to pay an equitable share of increased costs of providing or expanding the district's capacity to provide necessary educational services.

Fees to be paid by a developer shall be based upon the projected impact of that developer's project. Payment shall be paid to the district prior to recording of the residential subdivision plat, except as otherwise provided.

Adoption Date: November 22, 1993
