

## SCHOOL FACILITIES

### Planning

In order to provide the best possible physical environment for learning and teaching, the following factors shall be considered in the planning of district facilities:

1. Facilities shall accommodate the educational needs of students and be consistent with the educational philosophy and instructional goals of the district.
2. Facilities shall meet or exceed all health, safety, and welfare regulations.
3. The district shall seek state and federal moneys to the maximum extent available to supplement its own financial resources.
4. Undesirable environmental impact shall be minimized.
5. Changing demographic factors shall be monitored in order that students' needs are met when the future becomes the present.
6. Developments in the state cost stabilization program shall be followed when they are compatible with the district's educational goals and promise significant savings to the district.
